

NOVELIC is a high-tech company developing products in the fields of sensors, industrial electronics and wireless communications. We cover all subsystems of a modern electronic product under one roof: Embedded HW/FW, FPGA, ASIC, RF IC, etc. NOVELIC has dynamic and creative working environment with excellent working conditions. Responsibility and opportunity to lead and drive the projects is given. Stable long-term career roadmap for proven team members is our goal, so as yours.

We are pleased to offer a full-time position for:

Senior Software Developer

Responsibilities:

- Developing software solutions our users need; conferring with users; studying systems flow, data usage, and work processes; investigating problem areas; following the software development lifecycle
- Integration of SW solutions with the customer (on-site or remotely)
- Prepare and install solutions by determining and designing system specifications, standards, and programming
- Optimizing and improving already implemented solutions
- Understand business needs and know how to create the tools to manage them
- Support product, Quality Assurance, and support teams in the SW area
- Mentoring junior and mid-level engineers, support and develop software engineers
- Improve operations by conducting systems analysis; recommending changes in policies and procedures

Qualifications:

- Education level: Bachelor or Masters' Degree in the relevant area
- 6+ years of working experience in software development
- Thorough understanding of SW design and development process
- Experience with professional software engineering best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations
- Embedded C/C++ programming language, with good coding practices
- Experience with troubleshooting HW problems on prototype boards
- Experience with SW development quality management
- Experience with industrial and automotive communication protocols (Ethernet/IP, EtherCAT, CAN, SPI, UART, I2C, etc)
- Experience with reading and comprehending electrical schematics
- Experience with source control tools (e.g. Git)
- Proficiency in English, both written and spoken

Your Profile:

- Positive, motivated and eager to learn new things
- Knows appropriate software development methods and techniques
- High degree of autonomy and goal-oriented working
- Excellent communication skills and customer orientation

We Offer:

- Positive and friendly environment
- Work in a growing dynamic company on very challenging projects
- Flexible working hours, remotely work
- Highly paid business trips
- Attractive salary package with private pension and health insurance
